Next level tool logistics CoroPlus® Tool Supply

Easy customer interface, complex capability

You've already made the decision to secure, control and manage your inventories of consumable and durable goods used in the manufacturing process. Now take the next step in functionality, fit and security to improve efficiency, better match your business preferences, and leverage your ROI.

Advancements: Software and hardware

The next evolution in tool logistics software offers more advanced automation, multiple configurations and system choices, increased access to industry (supplier) data and better overall connectivity and reporting. CoroPlus® Tool Supply also includes a broad range of hardware choices for those installations that need to either expand capability or upgrade outdated control and dispense devices.

The big picture
Latest technology and capability

Service Plus offers increased automation and optimization

The next level of Service Management automates purchases eliminating phone calls and paper trails that can be time consuming and inaccurate. Also automated, maintenance issues such as refurbishment and calibration, and for tools, regrind or other. The system groups a minimum amount to be sent to the service vendor, offering a digital way to track the lifecycle of tools.

Enhanced ERP connection saves time

A key initiative for developing CoroPlus® Tool Supply was to improve ERP-integrations, streamlining customer processes and eliminating unnecessary time consuming handling of items and data.

Smarter reporting provides greater insights

CoroPlus® Tool Supply eliminates complicated reports with off-the-shelf results in just minutes that offer key business insights including better daily control of inventory. CoroPlus® Tool Supply also connects to BI tools to assist in the analysis of consumption, inventory, assets and employee data.

Digital access to more than one million products

The connection to Tools United provides instant access to more than forty suppliers, including data needed to support selection and application. This massive library of information has already been proven accurate and greatly reduces time spent to verify critical information.

CoroPlus® Tool Supply — for a more productive today and to prepare for next level logistics tomorrow.

Information, Installation, Integration

Three key technological advantages are addressed

Information, the basis for tool logistics, gets a boost in several areas such as item location and system monitoring to offer more for managers and users to use, control and interpret.

Features

- Reporting and alerting widgets
- Real-time Location of Durable items
- Managing assemblies
- Spare part management
- Overall system monitoring
- Facilitate ABC Purchase
- Past due date notifications
- Submit orders in multiple formats

Installation type now includes both on-premise and cloud based as well as several other user-friendly enhancements.

Features

- On-premise or cloud-based
- Automated backup and update processes
- Interface is user friendly
- Interactive dashboards and graphics
- Pick / choose items by application
- Trial subscription capability
- Control compatible with multiple hardware devices, including open storage
- Assign additional locations in the restock process

(Data) Integration: with CoroPlus® Tool Supply connected to your ERP system, you save admin resources that support automated purchases to avoid production delays caused by missing tools. Furthermore, you can now access tool data from more than 40 industry suppliers, over one million products.

Features

- Improved ERP-interfaces
- High level of support
- Service and calibration management
- Order acknowledgement
- Tools United integration
- Trigger / initiate recycle orders
- Device compatibility
- Data feed to direct Sandvik Coromant reporting system

Take the first next step

We've made the upgrade process easy and will ensure minimal interruption and down time during the changeover.

1. What you need to do – backup your system
2. What we need – confirm your system requirements
3. Our technical experts will do the rest – implement the new upgraded system, test, launch and follow up with support

CoroPlus® Tool Supply procurement and storage made for you.
